

Sarvesh Ghildiyal Software Engineer

✉ ghildiyalsarvesh@gmail.com ☎ +91 7017348970 🔗 LinkedIn 🐙 Github 📁 Portfolio 📍 Open to relocate

I have learnt. Software is not the end, but a means to translate deeper ideas from science, mathematics, physics, artificial intelligence, robotics, drones, and life sciences into scalable systems and usable experiences. I am domain-flexible, but serious about moving toward work that involves real engineering depth.

Professional Experience (Internships)

Backend Engineer, Wingify 07/2025 – 01/2026 | Delhi, India

- Contributed to VWO's **Data Aggregation & CDN (DACDN)** infrastructure supporting scalable, low-latency content delivery and real-time experiment data ingestion in a high-traffic production environment.
- Supported backend feature rollouts within a **decade-old distributed architecture**, ensuring reliable staging-to-production deployments.
- Built and integrated a **Kafka consumer** for event-driven experiment data processing.
- Diagnosed and resolved cross-service issues, improving overall system reliability.
- Worked within a structured PRD-driven development workflow, contributing to safe production merges in a high-impact infrastructure layer.
- Developed internal **AI-driven tools using MCP and LLM integrations** to enhance data analysis and product workflows.

Founding Engineer (R&D Team), Decube Innovation Labs 12/2024 – 07/2025 | Bengaluru, India

- Played a key role in the company's early-stage setup and delivered the first client MVP within **6 weeks**.
- Led a **2-member team**, improved development workflows, and increased delivery efficiency by **25%**.

Full Stack Developer, Vervegen Tech Private Limited 06/2024 – 09/2024 | Dehradun, India

- Streamlined development workflows by introducing CI/CD pipelines, standardizing GitHub repositories, and adopting a local-first development model with controlled production deployments.
- Drove adoption of the new workflows by leading a workshop for management and interns.
- Boosted team productivity by **50%** through automated deployments.

Virtual Lab Developer, Team Virtual Labs IITR 06/2024 – 09/2024 | Roorkee, India

- Developed an Engineering Chemistry Lab simulation using **p5.js**, earning Bronze Developer Certification.
- Contributed to IIT Roorkee's Virtual Labs initiative by improving tools for remote chemistry laboratories.

Projects

Connecte 📁, Self-Initiated SaaS Product 03/2026 – Present

- Tech Used:** FastAPI, React, Vite, PostgreSQL, Cassandra, Supabase, Cloudflare, Meta Cloud API
- Built and shipped a WhatsApp Business SaaS MVP for broadcast messaging, contact management, templates, and customer conversations.
- Qualified as a **Meta Tech Provider**, enabling business onboarding through Meta's WhatsApp Business infrastructure.
- Currently stabilizing the MVP and onboarding beta client users to validate workflows, pricing, and market demand.

AI Session Analytics Agent, Wingify

- Tech Stack:** MCP (Model Context Protocol), Azure OpenAI, AgentSDK, Langfuse, Python, Typer
- Developed an MCP-based backend workflow to process structured session recording data and generate LLM-assisted analytical insights as part of a user-facing prototype.

Competitor's Research Tool, Wingify

- Tech Stack:** MCP, FastMCP, Python, React, Google Sheets API
- Designed and developed an agentic interface that ingests a competitor's URL and automatically generates a comprehensive comparative report in Google Sheets, analyzing our product's knowledge base against the competitor's official documentation.

Skia Coffee Client Project, Decube Innovation Labs

- Tech Used:** Vue.js, Firebase (Auth, Firestore, Functions, Hosting), Headless UI, Shiprocket, GitHub Projects.
- Built and delivered the **Skia Coffee** web application with real-time order tracking and inventory updates, integrated with Android & iOS apps and the admin portal.

Cieszyc Web App, Spiders.co.in

- Tech Used:** Laravel, PHP, Guzzle, Spatie.
- Built and launched a college fest website featuring ticketing, event schedules, and submission/payment workflows, supporting **600+ attendees**.

Skills

Programming Languages: Python, JavaScript, TypeScript, Rust, Lua, C

Platforms & Tooling: Meta Business Platform, AstraDB, FastAPI Cloud, MCP, Langfuse, n8n, HubSpot, AI-Native Dev Tools
